Careers in Civil & Structural Engineering

WORK EXPERIENCE
APPRENTICESHIPS
&
GRADUATE PROGRAMMES

www.adeptcsce.com

Do you have a passion for engineering? Why not kickstart your career with us at our Leeds HQ, or one of our regional offices in Manchester, London, Birmingham, Hull or Sheffield*.

Graduate Programmes

Ready to start your engineering career with support from day one?

Our Graduate Programme gives you a structured development plan and the chance to work on real projects straight away. You'll use the latest tools and technology, visit sites and meet clients, and gain hands-on experience as you work towards Chartered status. We'll fund all approved training and professional membership fees.

You'll be supported by experienced engineers and associates — many of whom started their careers here as graduates — who will mentor you and help you grow. Join us and build a career where you can learn, contribute and make an impact from the start.

Apprenticeships

Every year, we offer opportunities for young people to 'earn while you learn'.

You'll join our current Level 3 & 6 apprentices working towards recognised engineering qualifications, and will be mentored by experienced engineers while gaining valuable practical experience as you study.

Your apprenticeship programme will be fully funded and supported every step of the way.

Work Placements

If you're at school or college, you can join us for a short placement to experience what a career in engineering is really like. It's a great way to explore the profession and decide if it's the right path for you. During your placement, you'll complete a 3D design project using industry-standard Revit software and shadow our engineers and technicians on live projects.

Longer summer and year-in-industry placements are also available. For younger students, we also offer one-day taster sessions.

Why Adept?

We offer some of the best rewards in the industry, including healthcare and wellbeing plans, gym contributions, salary extras and travel-to-work schemes. You'll also be part of a lively sports and social network and, as you grow in your career, you'll receive loyalty rewards.
